1830 x 990 x 910 mm	247 kg
Weight per compartment	Weight per spiral

max. 36 kg

max. 4,5 kg

Connection values

230 V / 50 Hz / < 1 kVA

## Clear Stock Control

ZOLLER »twister«, combined with ZOLLER TMS Tool Management Solutions Software, is the optimal solution for the output of tool components and accessories.

You always have the current stock of your cutting tools, insert tip packages, tool boxes or even your accessories in sight and can re-order on time. The machine stores the items in spirals, which issue stock items individually. Accurate circulation checks and storage transparency is guaranteed. The removals can be 100% traced and analyzed – thanks to seamless documentation in the item statistics module of user, time and quantity.
