2100 mm (83 in)	925 mm (36 in)
Width of the workbench	Depth of the workbench
1630 mm (64 in)	1040 mm (41 in)

## Comfortable Working Environment for Tool Assembly

The »toolStation« workbench from ZOLLER offers a spacious, illuminated place for the comfortable assembly of your tools. The perforated back wall enables you to attach standard peg hooks for storing hand tools and accessories. The robust Multiplex work top is perfect for use directly on your shop floor and stands up to rugged use. The lighting system makes for optimal lighting conditions from above as well as from the back. The ZOLLER workbench comes standard with table legs. The cable channel ledge on the worktop includes plug sockets and network connection. The »toolOrganizer« offers space for tool storage and accessories, is available with a central lock or electronic locking, and can be connected to TMS Tool Management Solutions software. Mounting the tool cabinets under the worktop, at each end, offers comfortable legroom.
