Comfortable working environment for tool assembly

The »zTower« mounting island from ZOLLER can be positioned in central open spaces and offers a well-lit workspace for convenient tool assembly. The perforated rear wall, equipped with a lighting system, allows you to attach standard fixing hooks to securely hold your hand tools and other accessories. The cable duct bar on the tabletop contains sockets and network connection. The »toolOrganizer« tool cabinet provides space to store additional tools. It is available with both mechanically and electronically lockable compartments and can be connected to the TMS Tool Management Solutions software.
