»millSet«	
Travel range Z axis	Travel range X axis
200 mm (7.9 inch)	200 mm (7.9 inch)
Tool Ø	Tool height
100 – 400 mm (3.9-15.7 inch)	50 – 200 mm (2-7.9 inch)

The storage place appropriate for the shop floor for facing cutters

ZOLLER »millSet« is the robust storage place for facing cutters that is appropriate for the shop floor, and can be placed directly next to the CNC machine.

It is designed for use in the middle of manufacturing. Fitted with a pneumatic switch for axis release and spindle brake, the axial runout of facing cutters can be tested and preset manually and tactilely with the dial gage. Simple and safe use for quick procedures — that's the ZOLLER »millSet«.
